*MobX Quick Start Guide* Pavan Podila,Michel Weststrate,2018-07-26 Apply functional Reactive programming for simple and scalable state management with MobX Key Features The easiest way to learn MobX to enhance your client-side state-management Understand how the concepts and components fit together Work through different state management scenarios with MobX Book Description MobX is a simple and highly scalable state management library in JavaScript. Its abstractions can help you manage state in small to extremely large applications. However, if you are just starting out, it is essential to have a guide that can help you take the first steps. This book aims to be that guide that will equip you with the skills needed to use MobX and effectively handle the state management aspects of your application. You will first learn about observables, actions, and reactions: the core concepts of MobX. To see how MobX really shines and simplifies state management, you'll work through some real-world use cases. Building on these core concepts and use cases, you will learn about advanced MobX, its APIs, and libraries that extend MobX. By the end of this book, you will not only have a solid conceptual understanding of MobX, but also practical experience. You will gain the confidence to tackle many of the common state management problems in your own projects. What you will learn Explore the fundamental concepts of MobX, such as observables, actions, and reactions Use observables to track state and react to its changes with validations and visual feedback (via React Components) Create a MobX observable from different data types Define form data as an observable state and tackle sync and async form validations Use the special APIs to directly manipulate observables, tracking its changes, and discovering the reasons behind a change Tackle any state management issue you may have in your app by combining mobx-utils and mobx-state-tree Explore the internals of the MobX reactive system by diving into its inner workings

Who this book is for This book is for web developers who want to implement easy and scalable state management for their apps. Knowledge of HTML, CSS, and JavaScript is assumed

Learning From Sure Start: Working With Young Children And Their Families Weinberger, Jo, Pickstone, Caroline, Hannon, Peter, 2005-07-01 ...an easy-to-read evaluation of a trailblazer local programme... packed with helpful information such as pointers for the future, pie charts and parents' stories (not translated into dry 'research' speak)... It renewed my passion and reminded me why I got involved in Sure Start in the first place Nursery World "This book demonstrates the key strength of Sure Start, its breadth of vision" It shows how with the right effort, statutory and voluntary organisations can work side by side. It also shows how important it is to engage local people in finding solutions, blending professional and community support to strengthen both Learning from Sure Start is a significant contribution to the evidence base on what works for young children and families. Naomi Eisenstadt, Director, Sure Start Unit Sure Start, an exciting initiative in early childhood care and education with families in the UK, has been developing new forms of community-focused early interventions, with the aim of having all children "ready to flourish" when they start school. This book, the first of its kind, is the result of a close collaboration between one local programme and a university over a five year period. The contributors all have first hand experience as practitioners or researchers in the Sure Start programme at Foxhill & Parson Cross in Sheffield, which has provided a wide range of new services. Contributors: Describe various services within health, education and social welfare Examine implications of the development of inter-agency theory and practice for planning and delivery of services for children Evaluate methods that were employed Identify what worked and what didn't Indicate lessons that can be drawn from experience This is indispensable reading for students of early childhood and early years practitioners, policy makers, and researchers.
