The Aircraft-Spotter's Film and Television Companion Simon D. Beck,2016-06-10 Ever wondered how many aircraft were converted into Japanese Zeroes and torpedo bombers for Tora! Tora! Tora! or how French Gazelle helicopters were modified for the title role in Blue Thunder? This first of its kind reference book lists aircraft featured in 350 films and television shows, providing brief individual histories, film locations, serial numbers and registrations. Religion and Politics in Contemporary Russia Tobias Köllner,2020-12-14 Based on extensive original research at the local level, this book explores the relationship between Russian Orthodoxy and politics in contemporary Russia. It reveals close personal links between politicians at the local, regional and national levels and their counterparts at the equivalent level in the Russian Orthodox Church - priests and monks, bishops and archbishops - who are extensively consulted about political decisions. It outlines a convergence of conservative ideology between politicians and clerics and also highlights that, despite working closely together, there are nevertheless many tensions. The book examines in detail particular areas of cooperation and tension: reform to religious education and a growing emphasis on traditional moral values, the restitution of former church property and the introduction of new festive days. Overall, the book concludes that there is much uncertainty, ambiguity and great local variation.

Anderson MSc, 2010-07-07 Aircraft Communications Addressing and Reporting System (ACARS) is a digital datalink system for transmission of short, and relatively simple messages between aircraft and ground stations using the airband VHF radio link. SITA, a multinational information technology company, later augmented their worldwide data network by adding ground radio stations to provide ACARS service.

Satellite Remote Sensing for Archaeology Sarah H. Parcak, 2009-03-31 This handbook is the first comprehensive overview of the field of satellite remote sensing for archaeology and how it can be applied to ongoing archaeological fieldwork projects across the globe. It provides a survey of the history and development of the field, connecting satellite remote sensing in archaeology to broader developments in remote sensing, archaeological method and theory, cultural resource management, and environmental studies. With a focus on practical uses of satellite remote sensing, Sarah H. Parcak evaluates satellite imagery types and remote sensing analysis techniques specific to the discovery, preservation, and management of archaeological sites. Case studies from Asia, Central America, and the Middle East are explored, including Xi'an, China; Angkor Wat, Cambodia and Egypt's floodplains. In-field surveying techniques particular to satellite remote sensing are emphasized, providing strategies for recording ancient features on the ground observed from space. The book also discusses broader issues relating to archaeological remote sensing ethics, looting prevention, and archaeological site preservation. New sensing research is included and illustrated with the inclusion of over 160 satellite images of ancient sites. With a companion website (www.routledge.com/textbooks/9780415448789) with further resources and colour images, *Satellite Remote Sensing for Archaeology* will provide anyone interested in scientific applications to uncovering past archaeological landscapes a foundation for future research and study.

New Conservatives in Russia and East Central Europe Katharina Bluhm, Mihai Varga, 2018-08-14 This book explores the emergence, and in Poland, Hungary, and Russia the coming to power, of politicians and political parties rejecting the consensus around market reforms, democratization, and rule of law that has characterized moves toward an open society from the 1990s. It discusses how over the last decade these political actors, together with various think tanks, intellectual circles, and religious actors, have increasingly presented themselves as conservatives, and outlines how these actors are developing a new local brand of conservatism as a full-fledged ideology that counters the perceived liberal overemphasis on individual rights and freedom, and differs from the ideology of the established, present-day conservative parties of Western Europe. Overall, the book argues that the renaissance of conservatism in these countries represents variations on a new, illiberal conservatism that aims to re-establish a strong state sovereignty defining and pursuing a national path of development.
