Harley Laroux

The Aesthetics and Psychology of the Cinema Jean Mitry,1997 Mitry was driven to explain the why, what if, and how come experiences that resulted after the wow experience in cinema. His theory uses psychology and phenomenology to understand how cinema can elevate the viewer from the everyday world.

The Dare Harley Laroux,2023-10-31 Jessica Martin is not a nice girl. As Prom Queen and Captain of the cheer squad, she'd ruled her school mercilessly, looking down her nose at everyone she deemed unworthy. The most unworthy of them all? The freak, Manson Reed: her favorite victim. But a lot changes after high school. A freak like him never should have ended up at the same Halloween party as her. He never should have been able to beat her at a game of Drink or Dare. He never should have been able to humiliate her in front of everyone. Losing the game means taking the dare: a dare to serve Manson for the entire night as his slave. It's a dare that Jessica's pride - and curiosity - won't allow her to refuse. What ensues is a dark game of pleasure and pain, fear and desire. Is it only a game? Only revenge? Only a dare? Or is it something more? The Dare is an 18+ erotic romance novella and a prequel to the Losers Duet. Reader discretion is strongly advised. This book contains graphic sexual scenes, intense scenes of BDSM, and strong language. A full content note can be found in the front matter of the book.

Stadium and the City Bale John Bale, 2019-06-01 This well-illustrated book is the first to explore the stadium as the principal container of the modern urban crowd and a place where thousands of people gather to take part in what often appears to be modern 'religious' rituals. Is the stadium a prison, a garden or a theatre? Do new stadiums contribute economically to the places in which they are built? Drawing on examples from Europe, North America and China, this book ranges from historical studies of stadium growth to current reviews of stadium development, exposing the stadium as a major element of the modern urban scene.

Olympic Architecture Barclay F. Gordon, 1983 This chronological survey of the architect's contribution to the modern Olympic games begins with the 1896-1932 sites along with each of the following summer games except 1948 (London) and 1956 (Melbourne), when there was no new construction of any consequence. Written in nontechnical language, the text provides considerable amount of detail on individual buildings and addresses questions such as financing and afteruse. ISBN 0-471-06069-0 : \$29.95.

The Stadium Michelle Provoost, 2000 The Stadium is an unprecedented and comprehensive look at the intersections between architecture, urban design, sports and sports culture -- from histories of the changing social function and character of sport, to the changing field of stadium architecture. A special feature is a series of 'city chapters' examining how individual cities deal with their sports complexes and how they use them as a springboard for urban redevelopment. The Stadium also treats a number of topical themes such as the influence of sports-fan 'hooliganism' on the design of a stadium and its surroundings, developments in areas of comfort, infrastructure, and commerce, advances on the technical front, and the working methods of architects specializing in the building of stadiums. In addition to designs by famous architects like Hitoshi Abe, Morphosis, Hani Rashid, and others, The Stadium also features descriptions, photographic documentation, and drawings of over 40 legendary stadiums, including the Colosseum in Rome, Lenin Stadium, the Moscow Stadium, Nagano Olympic Stadium, Dodger Stadium in Los Angeles, Soldier Field in Chicago, Wembley Stadium in London, Arena Amsterdam, the Toronto Sky Dome, and many others.

Modern Architecture Kenneth Frampton, 2020-12-17 This highly acclaimed survey of modern architecture and its origins has become a classic since it first appeared in 1980, and has helped to shape architectural practice and discourse worldwide. For this extensively revised and updated fifth edition, Kenneth Frampton has added a new section that explores in detail the modernist tradition in architecture across the globe in the late twentieth and early twenty-first centuries. He examines the varied ways in which architects are not only responding to the geographical, climatic, material and cultural contexts of their buildings, but also pursuing distinct lines of approach that emphasize topography, morphology, sustainability, materiality, habitat and civic form. It remains an essential book for all students of architecture and architectural history.

Architecture As Space Bruno Zevi, 1993-08-21 This classic work (first published in Italian in 1948, translated in 1957, and revised in 1974) examines the history of architecture in light of its essence as space, animating and illuminating architectural creations so that their beauty—or indifference—is exposed. Along with commercial and dwelling units, temples, palaces, and cathedrals, Zevi treats structures such as fountains, columns, and monuments, subjecting them all to aesthetic, cultural, and functional criteria and explaining them in easily understood terms. Beautifully illustrated with examples from the entire history of the art, this is one of the most stimulating and provocative books ever written on the history and purpose of architecture.
